

ELEVATOR
Display & Button Fixture
Display Fixture

Dot Matrix Indicator

The dot matrix indicator provides indication about direction of lift travel, position of the lift car as well as the rolling text message for various operational status of the lift such as Out-of-Service, Evacuation, etc.

LCD Display

Information display via LCD can be provided on the car operating panel (COP) or at the lift lobby above the lift entrance or the transom panel (in lieu of the standard dot matrix indicator).

Multimedia LCD Display

Multimedia type LCD can be mounted on the car operating panel or at the lift lobby providing more entertaining and informative environment while passenger waiting to reach their destination or waiting for the lift arrival.
