

## **EITA - Training**

### **Forklift Operators & Safety Training – 9 Nov 2013**

*On Saturday, 9 Nov 2013, a Forklift Operators & Safety training was conducted for EITA's personnel involved in driving forklifts. This training had both theory and practical components and was held at EITA Subang HQ premises.*

*The EITA participants were primarily the warehouse personnel from our various subsidiaries. It trained these personnel on the proper manner of driving a forklift, inclusive of safety aspects.*

*The first part of the training involved classroom learning, especially on the safety issues in handling forklifts. This was then followed by hands-on driving which included a tough 'obstacle' course which the participants found to be very challenging but at the same time educational.*

*In addition, Mr. KC Ho has also prepared a Forklift Operations User Guide which would serve as a handy training guide to train future forklift driver.*
